

HOW TO ASSIST ICU STAFF

- This is in the event that you have been asked to assist within a critical care environment

- **ENSURE THAT YOU ARE FIT-TESTED AND KNOW HOW TO USE APPROPRIATE PPE**

- Everyone is aware that other staff could be working outside their normal environment

- The work you might undertake might not be clinical – it may be **administrative**

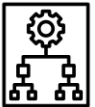

- Seek to educate yourself about aspects of critical care (*see website link below or QR*)

- Introduce yourself to the **nurse in charge** and explain who you are. **If you have any Q's - ask someone.**

- You should understand the concept and method of **'proning'** patients – (*see website link below or QR*)

- Seek to familiarise yourself with trust guidelines and protocols pertaining to COVID19

THANK YOU FOR YOUR CONTRIBUTION TO THE WORK OF CRITICAL CARE!
